

Online Banking has the option to export transaction history to either the Quicken or Quickbooks products using their WebConnect online access.

IMPORTANT! If this is the first time using the Quicken/Quickbooks Export in our new Online Banking service, please review the documentation in the Export Account Information section located at <https://www.americanfederalbank.com/help/> before proceeding. These steps must be completed before proceeding or you may have duplicate transactions in your export file(s).

To create the export file for Quicken or Quickbooks, complete the following steps:

1. Open your Quicken or Quickbooks software application.
2. In Online Banking, click the account you want to export transaction history for from the Home Page. The Account Details screen is displayed.
3. To export data for the time period desired, click the Show Filters link.

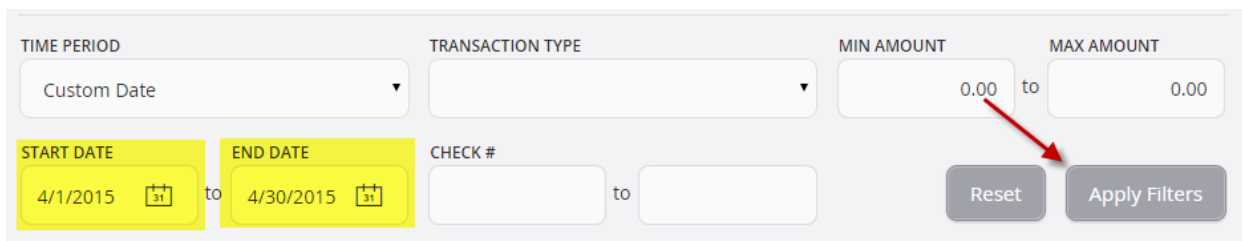

Joint account
XXXXXX0450 **\$88.02**

Available Balance	\$88.02	Interest Rate	0.010 %
Current Balance	\$88.02	Last Statement Date	5/4/2015

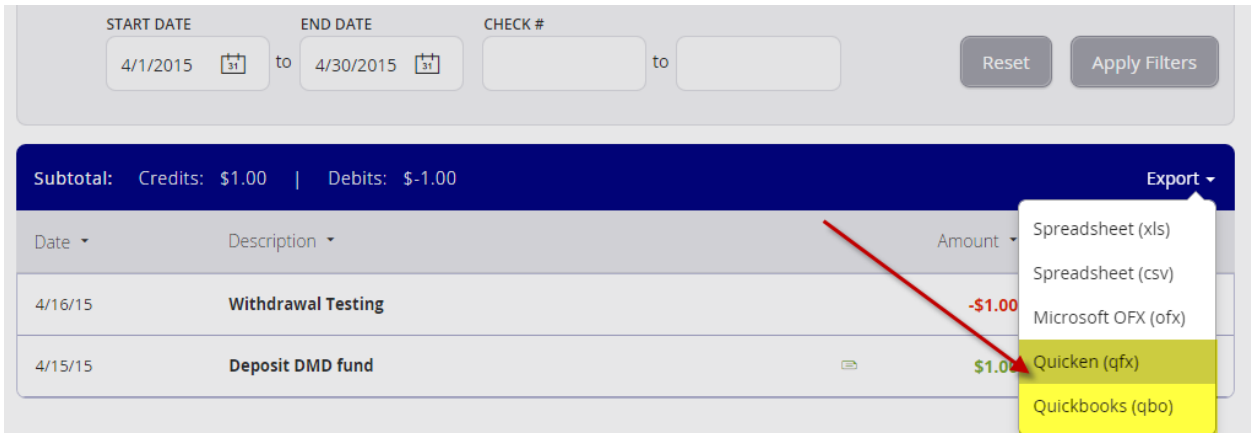

Show Filters ▾

4. In the Time Period field, choose Custom Date and select the date range in the Start Date and End Date fields. Then, click the Apply Filters button.

TIME PERIOD	TRANSACTION TYPE	MIN AMOUNT	MAX AMOUNT
Custom Date ▾	▾	0.00 to	0.00
START DATE	END DATE	CHECK #	
4/1/2015 [calendar]	4/30/2015 [calendar]	to	
		Reset	Apply Filters

- Click the Export dropdown and select Quicken (qfx) or Quickbooks (qbo).

The screenshot shows the American Federal online banking interface. At the top, there are filters for START DATE (4/1/2015), END DATE (4/30/2015), and CHECK #. Below the filters is a summary bar with "Subtotal: Credits: \$1.00 | Debits: \$-1.00" and an "Export" dropdown menu. The dropdown menu is open, showing options: Spreadsheet (xls), Spreadsheet (csv), Microsoft OFX (ofx), Quicken (qfx), and Quickbooks (qbo). A red arrow points to the "Quicken (qfx)" option.

Date	Description	Amount
4/16/15	Withdrawal Testing	-\$1.00
4/15/15	Deposit DMD fund	\$1.00

- In the bottom left corner of the window, the download file is created.

- If you already have Quicken or Quickbooks open, a message box appears. Click Open and your transactions are exported into Quicken or Quickbooks. (If you did not have the Quicken or Quickbooks application open, open it now and follow their prompts to complete the download process.)

The Quicken/Quickbooks download process is intuitive and should not allow duplicate transactions to be imported. Quicken/Quickbooks will walk you through the review process if it believes it is detecting duplicate transactions. During that process, you select whether the transaction is to be imported or removed. Refer to Quicken Help or Quickbooks Help for further assistance with importing transactions.
